

CLAIM AMENDMENTS

1-14 (canceled)

1 15. (New) An antenna assembly for mounting upon a wall
2 of a vehicle body, comprising:

3 a base plate of metal having a plate-shaped portion
4 adapted to be juxtaposed with said wall and a threaded stud
5 projecting from said plate-shaped portion and passing through a
6 hole in said wall;

7 a housing composed of plastic and enclosing antenna
8 elements mounted upon said base plate;

9 an injection-molded seal between said plate-shaped
10 portion and one side of said wall and sealing said base plate
11 relative to an interior of said body, said seal being formed with
12 an outer periphery terminating at an outer edge of said base plate
13 and said seal and having:

14 an inner seal bead hugging said stud and
15 compressed between said plate-shaped portion and said wall adjacent
16 said hole,

17 an outer seal bead along said outer perimeter
18 of said seal and interposed between an outer edge of said base
19 plate and said wall, and

20 at least one seal portion between said beads
21 projecting through an opening in said plate-shaped portion; and

22 a nut threaded onto said stud and braced against another
23 side of said wall.

1 16. (New) The assembly defined in claim 15 wherein said
2 beads have generally circular cross sections.

1 17. (New) The assembly defined in claim 16 wherein
2 said base plate has ridges flanking said opening and said seal
3 portion projecting through said opening.
